

Ferrule STS Talurit®

Product information

Ferrule for splicing of steel wire rope.

Typically carbon steel ferrules are used when corrosion, higher temperature and special dragging applications are used. This system is also an alternative to the flemish eye, this is due to the fact that you have all the benefits as above but the simplicity of a straight turnback system.

The turnback ferrule system is easy to use. It is quick, safe and has proved itself to be totally reliable. It is far more efficient than all other swaging methods on the market.

Material: Carbon steel

Marking: According to standard

Standard: EN 13411-3

Note: See the manufacturer's product data sheet below for guidance on dimension selection.

Part code	Ferrule size mm mm	Length mm
120100500140	5	22
